CHINESE SOCCER TEAM WINS FROM TECH ON BREAKS

Neubauer Scores for Tech

CHINESE KEPT ON DEFENSIVE

The boys of the striped jerseys lost a hard fought game last Saturday afternoon to the strong Chinese team of Greater Boston. The game was as close as close could be; for after having displayed a fine brand of soccer and leading the Chinese 1 to 0 for the greater part of the game, the breaks turned against them and their opponents pushed through two goals in the latter part of the last period, reversing the lead. Captain Wright was unable to play this week, and his pep was missed, but the rest of the team worked in unison and fought harder than ever to "bring home the bacon." Three of the members of the Chinese team are also members of the M. I. T. aggregation that defeated Tech 1 to 0 last week. Neubauer, Rey and Lamay put their last ounce of strength into the fray in a struggle to bring the team through with the result that they were in every scrimmage with a fight and skill that was worthy of the old Crimson and Grey.

The Chinese had the kick-off and started a fast game from the very beginning which lasted until the final whistle blew. Both teams were about equal in the passing game with the visitors a little better in heading the ball, but not so good on the offensive. Tech got the first tally of the game when Neubauer booted a clever pass from Rey between the posts for the count. With Tech once in the lead it seemed an easy thing to maintain the advantage, for Tech's goal was practically clear of danger for the remainder of the period. Nelson's greatest task being to keep warm. The Chinese on the other hand had a hard session to go through with the ball in

their territory for the greater part of the time, and it was only fate that robbed Rey and Neubauer from the goals that should have resulted from the shots they took in front of the goal that only missed their marks by the smallest margins. However, the half ended with Tech in the lead, 1 to 0.

The second half was a repetition of the first in that the majority of the playing was in the Chinese territory. However, the Boston team was more fortunate and about the middle of the half tied the score at one all.

Wang and Hsir were the most effective men on the opposing team. Hsir was responsible especially for the rallies of his team by his clever and fast pass-work. Although Lamay and Neubauer worked with all their might they were unable to get the ball across the line for a second goal for Tech. The scoring was ended for the day after the Chinese got their second tally from a shot from a corner bouncing off one of our men into our goal. Thus the game ended 2 to 1 for the Black and Green.

CROSS-COUNTRY TEAM LOSES TO M. A. C.

Doe Roms in With First Honors

FORBES SECOND

Although Tech lost the cross country meet to M. A. C. by the score of 31 to 26, they put up a very creditable fight.

If looked at from another angle Tech won the meet, gaining first and second places. Chester Doe, a product of South High, and a yearling at Tech, finished first in championship style. By his spectacular running Doe lowered the time for the course, finishing in 27 minutes and 38 seconds.

Danny Forbes, Tech's old standby in track, although a considerable distance behind Doe, won second place handily. The next Worcester man to cross the tape was Pendleton who ran a very spirited race with Tobey of M. A. C. for seventh place on the home stretch.

The runners finished in the order named: Doe, W.; Forbes, W.; Wheeler, M.; Bartlett, M.; Cook, M.; Slown, M.; Pendleton, W.; Tobey, M.; Delano, W.; Hennerberg, M.; Bannister, W.

The harriers for Tech were better in every detail than those from M. A. C. Only five men ran for Tech against about ten for the Aggies, and out of those five two gained first and second honors. If Tech only had about fifteen or twenty men out for the cross country team they could have defeated M. A. C. with comparative ease.

FRESHMEN!

Just a Reminder

Perhaps some of you have forgotten that rushing begins this Thursday at seven a. m. At this time you will be promptly awakened and asked to come to breakfasts, lunches and dinners. These invitations will last until the following Thursday at one p. m.

It might be well to say that no one will do much work during this week, and if you want to keep your work up, you had better work harder up until Thursday.

Article III, Section 1 of the Interfraternity Council Rushing Rules reads:

"The bids shall be given in writing at a single definite time and place. The time (not to be later than forty-eight hours after the close of the rushing period), place and method of presenting the bids and of their acceptance shall be determined yearly by the Council at its first meeting in the fall."

Article IV, Section 1 reads:

"Acceptance by a Freshman of any bid, formal, informal or implied, made prior to the official bidding time, shall not be regarded as in any sense binding."

The bids will be given out at Chemistry lecture on the day after rushing closes. The Freshman will be given an hour to decide where he wants to join.

TECH LOSES HARD FOUGHT GAME

Guidi and Converse Shine

SENSATIONAL PLAY IN LAST HALF

Outweighed twenty pounds per man, the Tech gridsters were unable to withstand the smashing attack of the Mass. Aggie football team Saturday afternoon on Alumni field.

In the first half after receiving the kick-off, the heavy Aggie backs aided by splendid interference smashed and rushed their way from mid-field for their first touchdown in about three minutes of play. The light Tech backs were unable to pull the runners down due to the interferers, who invariably prevented them from making clean tackles. During the rest of the first half the Aggies ran off-tackle plays with an occasional stab at the center of the line and seemed to gain almost at will. Although fighting hard, the Tech line-men did not seem to be able to get the runner in the first half, and thus the backs were forced to make tackle after tackle which seemed to have a telling effect on their ability to run the ball on the few occasions that Tech was able to take it from the Aggies.

McGeoch, the Aggie's left halfback, was a tornado on the offensive and along with Sullivan, the other halfback, made gain after gain during this half, and between them scored six touchdowns, thus putting Tech on the short end of a 40-0 score at the half.

The short rest period between the halves seemed to put a new lease of life into the scrappy Tech warriors and from the beginning they outfought the Aggies in this half. "Dick" Converse received the kick-off while standing on

the goal line and aided by a bank of interferers he dodged and wriggled his way to mid-field when the only Aggie man between him and the goal line pulled him down. It was without doubt one of the prettiest runbacks ever seen on Alumni field and was characteristic of the pretty running that "Dick" has shown us so far this year. After running two plays without gaining, Converse punted over the goal line and it was the visitors' ball on their 20-yard line. It was here that "Lute" Martin came into the lime-light. After "Lute" had broken through three times in a row to throw the Aggie backs for a loss, they were forced to kick to Converse who again uncorked a long runback, travelling through a broken field 40 yards to the Aggies' 15-yard line. Latimer made 5 yards through center and after an unsuccessful attempt at the line, Guidi, standing behind the goal line, grabbed a pass from Converse for Tech's first touchdown. During the remainder of the quarter Tech held M. A. C. time and again and the game grew into an exchange of punts. After the withdrawal of "Charlie" Moran near the end of the second quarter, Converse had to assume the punting responsibilities and although outdistanced in the exchange, he evened things up by running back the M. A. C. punts in fine style. At the beginning of the last quarter, the visitors again pushed the ball over, thereby evening the (Continued on Page 2, Col. 4)

MUSICAL CLUBS DANCE SAT- URDAY NIGHT

Hardy's Orchestra Chosen

On the night of October 25th, after the Rope-pull and the football game, every living soul in college ought to be happy,—if not over the Rope-pull then over the game, or vice versa. Now the Musical Clubs are going to provide a very choice outlet for all those joyous feelings by giving a dance at the Gym.

The best orchestras in the New England states are being considered and the one that appears to be best has been chosen. Everybody except the Freshmen have pleasant memories of the Gym all decorated up so that it looks like fairy land. Then with lights dim, a good orchestra playing snappy music, and the best of all companions at your side,—we have the perfect ending of what we all confidently expect will be a perfect day.

The Musical Clubs are sparing no efforts to make this one of the best dances of the year, and one thing you will have to admit, is that they are the boys who ought to be able to pick a good orchestra if anyone can. After most of their concerts they have

(Continued on Page 3, Col. 5)

FRESHMEN WIN MEET

Carpenter High Scorer

The Frosh have won their first event of the year by defeating the Sophomores sixty-one to forty-seven in the track meet. Two events, the hammer throw and the javelin, had to be postponed until this week, but if the Freshmen can capture three points, and it is certain they can, they will have amassed more than half of the possible points.

The first year men are much indebted to Captain Chet Doe, the South High star, for pulling together such a fine team. Although handicapped by the lack of two sprinters, Guidi and Converse, who are on the football squad, the team made a fine showing.

Captain Purdy Meigs of the second year team was unable to participate because of an injured foot and the loss was felt keenly by the team. Tarbox of the Sophomores, and Stoughton of the Freshmen, did splendid work, each gathering nine points. Carpenter, '27, was high scorer, taking three firsts for a total of fifteen points.

The events and results follow:
100-yd. dash: Carpenter, '27, Tarbox, '27. Time, 10 4-5 seconds.
220-yd. dash: Carpenter, '27, Shreeve, '28, Tarbox, '27. Time, 24 4-5 seconds.

(Continued on Page 3, Col. 4)

AFTERMATH DEDICATED TO PROF. SWEETSER

[Picturers Slow in Coming

Work on the 1925 Aftermath is rapidly progressing under efficient management and is already well advanced for this time of the year.

At the meeting of the Aftermath Board held Oct. 16 it was voted to dedicate this year's Aftermath to the late Prof. Sweetser. This is a fitting tribute to one who always was a friend of the entire student body.

The individual write-ups have been started, and it is the goal of the staff to have these all in by Dec. 1. Work on the individual photographs was started this week and these also will be finished by Dec. 1. Write-ups of Professors and Instructors will be in Thursday. The contract for the printing has been awarded to the Heffernan Press of Spencer, and the cover design as in previous years will be made by David J. Molloy Co. of Chicago.

Many changes have been made from former year books, the dedication section has been changed and the pages will be old ivory color in contrast to the usual black and white.

The most difficult proposition is getting the characteristic pictures. This always causes the officers annoyance and delay, so this year it is requested that the members of the Senior Class co-operate and get these in as soon as possible. You will all want your book on time, so do your share and get the characteristic pictures in.

DRAMATIC ASSOCIATION TO HOLD ELECTION

Date Set for Meeting

The Dramatic Association expects to hold its first meeting of the year about November 10. At this meeting the elections for a new secretary, a new general manager and a new stage manager will be held to fill the places left vacant by H. A. Emerson, C. C. Smith and F. T. Johnson, who did not return to the Institute this year. The plan of having two casts, one composed of upper classmen and one of Freshmen as last year, will also be discussed. The officers for the coming year are: president, S. R. Wendin, '25; vice president, D. G. Downing, '26; business manager, P. S. Otis, '26; advertising manager, R. W. Gillette, '26; and publicity manager, C. T. Smith, '26.

The Association still offers a prize of \$50.00 to any student who will write an original play or skeleton outline of a play sufficiently good to be presented by the Masque. The parts in the play and all the assistant manager-ships are open to the entire student body.

The Dramatic Association has made rapid strides in the last few years and last year the annual show was presented on three nights at the Worcester Theatre instead of Tuckerman Hall as in previous years. This year will show an even greater advancement if the student body will do its share in backing up the Association by trying out its parts in the cast and in attending the performances.

THE SOLUTION TO OUR PROBLEM

Last Friday at the mass meeting Professor Adams made the plea that in our school sports and activities we constantly keep in our hearts the thought of John Boynton, the founder of what is today Worcester Polytechnic Institute. Has that idea gone home? Do you realize just what it means?

That idea is the long-sought solution to a vital problem here at Tech! It suggests the answer to the old question which we have all heard so often and which we have all asked so often, "What is the matter with our school spirit?" or truer still, "Why have we no college spirit?" The answer suggested by Professor Adams' idea is this. We have never found anything from which we could possibly build up college spirit! Have we ever developed any traditions or ideas? Have we ever found any noble personality whose praise we could sing, whose memory we could revere, and whose spirit would be our very criterion?

Where is our John Harvard or our Eli Yale or our Lord Geoffrey Amherst?

Tech today stands for things material and for very little but things material. We come here for the material purpose of learning to make a living. Our curriculum, the so-called broadening courses to the contrary, deals with the material and little but that. Our campus represents so many material buildings set upon a material hill. We are even prone to judge our alumni by their material success alone. In fact it is to be wondered at that they make any but material success in life.

In short, Worcester Tech is sadly lacking in those things spiritual which in themselves are the very essence of a college "spirit." We need those things which quicken the pulse of the student and beget in him a loyalty and love for his Alma Mater. We need those things which will send our students out into the world with a fine morale besides a fine money-making ability. Let's bring old John Boynton back to life and start building a real college spirit!

OBJECT LESSONS

Most of us have seen signs in bank windows urging us to "save up for a rainy day." Most of us smile rather broadly and walk on. Did you ever think that that advice applies well to everything including studies?

Most of us have lighter schedules on some days than we have on others, or perchance we have a week end to loaf away. Much of the studying is assigned far enough ahead so that at those times we might, if we only would, do a whole lot of studying in advance. Now there is quite a bit to this. It involves psychology, staying eligible for athletics, and perhaps, in the long run, staying here in college.

Now, consider the psychology of the thing. Don't you get infernally sick of always being behind in your work? And don't you wish that you didn't have to study every night? All right! Get your work done ahead of time.

One can't always tell just what coach has up his sleeve to spring tonight. How about using those spare hours during the day and getting the work for tomorrow done,—and then when you are dog-tired after hard practice you won't have to consign all the work to other regions.

Did you ever notice that when you have done your work regularly in a course, day by day, you are not afraid of the monthly examination when it comes, or even the final, for that matter? We all rebel at doing our work day by day. Very well! Fool yourself and do it in advance.

This idea is novel and almost revolutionary to the majority, and consequently we expect that the doubters and skeptics will be numerous. But just try it for a week and see how it works. Profs never change their minds about lessons and you needn't be afraid of having to work any harder. Ordinarily week ends are for pleasure, but week days are for hard work. Just as an experiment, reverse the process, and work over a week end and then go out on week nights when the other poor cusses have to work, and see if you don't get a kick out of it. If the student body as a whole adopted this plan, the Athletic Association would be so happy they wouldn't know what to do, for there wouldn't be anybody who would be ineligible, and the faculty would find that at least the general average of grades had been raised.

"Y" SOLICITS SUPPORT

Plans Drive for Funds

The "Y" like every other organization must have support, both financially and of the men, in order to continue its existence. We feel that the "Y" is filling a need at Tech and that its existence is justified. Since we do not have a regular membership fee or other income, we must rely on the free-will donations of the fellows who believe in the "Y" and would like to see it continue actively in Tech affairs.

Probably many of you are in the same predicament as the old Darkie who was recently married. On being asked how he liked married life he replied: "Well, Judge, it's alright, I guess, but that ole woman o' mine is all a time axing me fer money. Sometimes half a dollar, sometimes a dollar, sometimes two." He was then asked what she did with all that money. He replied: "Well, boss, I sure don't know. Yer see I ain't done give her none yet."

If you will just try us out with a little of your money we will be glad to show you how well we can use it. Following are a few of the hundred and one demands on our treasury. Every year a letter of welcome and offer of services is sent to each prospective Freshman. Soon after this the reception is held in honor of the new men, to which you are all invited. Fifty gallons of cider, sixty dozen doughnuts, etc., all add to the expenses.

Then there is the matter of the Handbook which about 99.96% of you are anxious to accept. The Handbooks themselves, fortunately, under good management are a self paying proposition, but the leather covers that we give out set us back a matter of \$50 to \$60 a year. How many of you, when you use the reading room ever stop to think what the subscriptions to all these magazines cost? There are also pledges to be paid to the state and national work. Last year one hundred (\$100.00) dollars was sent to the Jaro Industrial School, "Tech in the Philippines," the principal of which is a former Tech man and "Y" Secretary.

We helped out our less fortunate fellow students of Europe through the Student Friendship Fund to the tune of one hundred and fifty dollars—(\$150.00). Delegates to conventions, if they can not pay their own expenses, are helped to about half the cost.

The pool tables which so many of you like to use, have to be reconditioned every year. It takes a lot of nickles to make up \$50 or \$60 for this, but if every fellow remembered to sign up and pay for all the half-hours that he plays, the tables would doubtless be self-supporting.

All of the money received by the "Y" from you fellows goes to carry on the actual operating expenses of the Association. The expenses of the Secretary do not come out of this, but are entirely looked after by the Advisory Committee.

When the campaign is launched in a few days we hope that you will all feel like taking a share in this work and helping out to the extent that you feel able. Two dollars a man will go a long way in helping us carry on. Now is your chance to show your approval of the "Y" and when a collector approaches you in the near future we hope you will be in a liberal frame of mind.

RODERICK C. HALL,
Secretary.

Freshman: I see our Christmas vacation extends to January.

Senior: I will look in my Tech Bible to see if it includes New Year's.

FOOTBALL

(Continued from Page 1, Col. 5)

scoring in this half. Tech elected to receive and after being held for downs, Converse punted but got only 30 yards on the kick. After being penalized rather heavily, McGeoch kicked to Converse, who, unfortunately, fumbled on Tech's 5-yard line and M. A. C. recovered. Here again courage and fight of the Tech boys was displayed and the Aggies were held on the 5-yard line for four downs and it was Tech's ball. On the third play the rooters were brought to their feet when Converse, standing on his own 15-yard line, threw a 20-yard pass to "Joe" Guidi, who, after a hard run, made a seemingly impossible catch and, with no interference whatever, "Joe" wiggled past two men and then outstripped the whole invading backfield, and after a wonderful 70-yard run "Joe" fell over the goal line and collapsed. It was a dramatic climax to a heart-rending stunt, and this it was. Having been battered and bruised for nearly the whole game, and limping badly with a wrenched ankle, it was almost a physical impossibility to run at such a speed as was necessary, but, showing remarkable grit and determination, "Joe" finished his task before faltering and then fell in a state of collapse amid the loyal cheers of his rooters and teammates.

The lineup:

W. P. I.—13	54—M. A. C.
Query le	re Jones
Sanborn lt	rt Mouridian
Cormier lg	rg Gavin
Lewis c	c Coubig

Architects

"The New Architecture"

A DISTINCTLY new tendency is apparent in architectural thought and design today. Architects are designing in masses—the great silhouette, the profile of the building has become of far greater importance than its detail.

There is a new vigor and ruggedness even in buildings which are conventionally classic in their detail. Masses mount upward, supporting the tower, accentuating its height. The new architecture is tending toward great structures rather than multiplicity of detail.

Certainly modern invention—modern engineering skill and organization, will prove more than equal to the demands of the architecture of the future.

FRATERNITY NOTES

Sigma Alpha Epsilon

Brother Price from Penn State, and Brother Sampson from New Hampshire State College were visitors over the week end.

Sigma Alpha Epsilon wishes to announce the initiation of D. L. Hussey, '25, and Herbert Wittig, '26, and William Stewart, '27.

The house held an informal dance on October 18.

Lambda Chi Alpha

An informal house dance was held on Saturday, October 18. Mr. and Mrs. Mumford were chaperons.

Theta Chi

Carl Johnson, ex-'24, visited at the house last Saturday.

Brother Gardiner, '11, of Natick, Mass., visited at the house Wednesday. Brother Gardiner is a civil engineer and is employed by the B. and A. railroad.

Theta Chi wishes to announce the initiations of Merle Hutchins, '25, and Philip Andrew McArdle, '27.

Carrol Tucker, ex-'24, who has been visiting at his home in Barre, Vt., has returned.

Theta Upsilon Omega

Recent visitors at the house were F. T. Johnson, ex-'26, H. A. Emerson, ex-'26, and E. D. Johnson, '21.

An informal house dance was held at the house last Saturday night.

Brother P. C. Pray and his wife were chaperons.

Alpha Tau Omega

The house held an informal dance on Saturday, October 18.

Brothers McAllister and Meyer, '23, were visitors over the week end.

Dr. Zinn wishes to be remembered to everyone on the Hill.

Brothers Johnson and Wilder were guests over the week end. Also Colesworthy and Heffernan, '22, were recent visitors.

Phi Sigma Kappa

On Saturday, October 18, a meeting of the chapters of the New England Association was held at the house. The brothers present were: Watts, from M. A. C., Secretary and Treasurer of the Council; Potter and Crosby also from M. A. C.; LeGuere, Coquir and Dugan from Union College; Brown and McCormick from M. I. T.; Potter from Brown; Lawton from Yale; and Chambers from St. Lawrence.

Recent visitors at the house were: Brothers "Bud" Thayer, "Ed" Bateson, "Cy" Campbell, "Phil" Robinson, "Chick" Seaver, Dwight Sponberg, and "Pinkie" Berg.

CAMERA CLUB

The second regular meeting of the Camera Club was held last Wednesday evening at 7.30. President Spurr presided and introduced as the speaker of the evening, former President Sawn, who gave a short talk on "Multiple Gumprinting." Prof. Adams spoke on

THE surest thing about a pencil with a fine, long point is that the fine, long point will soon wear off. Five minutes of rapid note-taking, and you're down to where the point is broad, and there the lead lasts much longer.

Here, in principle, you have a key to the superiority of a roller over a ball bearing.

Two surfaces, separated by a ball, must rest upon points in the circumference of the ball. They rest upon points because there's nothing else in the circumference of a perfect ball but points.

Two surfaces that are separated by rollers, however, rest upon the broad length of the surface of the rollers.

Although made of steel instead of graphite, and thus infinitely more enduring, the difference in life between a roller bearing and a ball bearing is nevertheless typified by the sharp vs. dulled pencil point. The broader the surface over which the load is distributed, the less rapid the wear—and the longer the life of the bearing.

Timken Bearings, in addition to being roller bearings are also tapered roller bearings. Because of the taper, they withstand the loads which are called "end thrust," as well as those directly at right angles to the axis in which the bearing is mounted, called "radial load." Only tapered bearings have the capacity in one bearing to withstand both these loads.

RIVALS THE BEAUTY OF THE SCARLET TANGER

You Can't Keep Your Head on Your Work

If Your Pen Demands Your Attention

YOU cannot compose your thoughts—cannot note the points of a lecture, if you are writing with a pen that loses step as you go along. That pen is a mental drag.

The sooner you replace it with the never failing, never ailing Parker Duofold, the quicker you will hit your stride in college work and social correspondence.

Duofold not only gives the mind full play and the hand full swing—its fit and balanced symmetry and jewel-smooth point inspire and stimulate. They tend to develop a hand of speed and character.

And we guarantee the point, if not mistreated, for 25 years' WEAR. So Duofold at \$5 and \$7 is the most economical pen—less costly than short-lived pens priced lower.

Any good pen counter will sell you Parker Duofold—flashing plain black; or black-tipped lacquer-red, a color that makes it handsome to own and hard to lose.

THE PARKER PEN COMPANY
Manufacturers also of Parker Duofold Pencils
to match the pen, \$3.50

the club activities. The rest of the meeting was spent in informal discussion of various prints which were brought for the occasion. The meeting adjourned at 9.10.

SOPHOMORE CLASS MEETING

At a meeting of the class of '27 a long discussion was held concerning the Rope Pull. It was announced that the event was to be held on Saturday afternoon, October 25th, the date set by the Tech Council. After the class was certain that it was desirous of having a Rope Pull, nominations were received for captaincy of the Sophomore team. The men nominated were Rouha, Irons and Dickenson. Rouha was elected.

The primary elections for class officers were then held. As a result, the primary nominees were elected as follows: for president, B. Wahlin, G. Rice, D. Bliss; for vice president, V. Pitfield, B. Sanford; J. Murphy; for secretary, J. Crosier, M. Beth; treasurer, P. MacArdle, R. Jones, R. Whittemore. The final elections will be held at the next class meeting.

INTERCLASS TRACK MEET

(Continued from Page 1, Col. 2)

Discus: Paul, '28, Kimball, '28, Rice, '27. Distance, 93 feet, 10 inches.

MUSICAL CLUBS' DANCE

(Continued from Page 1, Col. 1.)

dances for themselves and audience. And after that experience—WOW!

And Freshmen!—if you swap a dance with an upperclassman and he doesn't show up at the proper time, be sure to use your own discretion about it, but he will probably be up somewhere around the indoor track, and you can go up and demand your dance if you think it advisable. For you must know that decorations and conditions always conspire to allow the old indoor track to lend to the enjoyability of the evening.

The committee composed of "Mab" Steele, chairman, "Newt" Loud and "Fat" Heseltine have secured a skilled decorator to transform the Gym into a ballroom. The contract calls for a general color scheme of black and orange with novel lighting devices. The tickets are only two dollars per couple, and they may be secured from any member of the Clubs.

All out to the first big dance of the year!

DENHOLM & MACKAY CO.

We Have Arranged With the Maker of What We Believe to Be
THE BEST FOUNTAIN PENS

To supply us with a quantity under our name. These pens are of the great quality and standardization of the great pen itself—but because we have featured it and made it a best seller—the manufacturers were willing to make a concession recognizing our efforts.

These are the same quality and make of pens which we now retail at from \$2.50 to \$5.00. While this limited supply lasts, \$1.50.

WIRELESS CLUB

A meeting of the Wireless Club was held last Tuesday night at five o'clock in the E. E. building, and a large delegation was present. One new honorary member, Major Howe and fifteen new members were voted in. The operating department has been organized and there are now more operators for the station.

Plans were made for a smoker to be held at the E. E. building Tuesday night, November 4th. Lee Bates, retiring A. R. R. L. representative, the newly elected representative, Mr. Newell and Major Howe have been arranged for as speakers for the evening. This meeting is open to all Worcester radio fans as well as for the students. Announcements will be made later through Sherer's broadcasting station.

Y. M. C. A. NOTES

Last Monday evening the second Cabinet meeting of the year was held. Careful plans were laid for the coming financial campaign and the budget was drawn up. Plans for further weekly meetings were discussed and a list of speakers selected. In this list are some of the most prominent men in Worcester.

The Sunday evening meeting, October 26, will be omitted because of rushing. The meetings will be resumed immediately after rushing, however, with the continuing good program and with special music as an added attraction. These weekly meetings have proved to be a successful and interesting innovation to Tech life judging from the attendance and attitude of those present.

FACULTY TO VOTE IN STRAW BALLOT

The faculty of the Institute are to be given the opportunity to vote in the coming straw ballot on the presidential election. However, they will not vote at the assembly on October 23 when the students cast their ballots.

A blank ballot is to be placed in the mail box of each member of the faculty, such ballot to be filled out and deposited as per the instructions to go with each. This will enable each member to poll his vote even though he is unable to attend the assembly next Thursday. The results of their voting will be tabulated and published along with the vote of the students in the next issue of the NEWS.

ROPE PULL

The annual rope pull between the Freshmen and Sophomores is to be held before the football game with Lowell Textile next Saturday, Oct. 25. It is to be staged at Institute Park as usual, but at one o'clock instead of after the game.

Both classes have been hard at work

practicing for the event, the two classes alternating practice each night. Public sentiment always favors the Freshmen, and if the spirit with which they are carrying out practice may be taken as a sign, they seem certain to come away from the park wet with perspiration only.

THE TECH BAND

The Tech Band is getting lots of moral support just at present but the finances are not in the best possible state so it's up to us to see that the Band gets the necessary financial support. According to the Band Master, Tom Steward, there is an immediate necessity for about \$30. This will pay for the repair of instruments which are the property of the Band and will defray the cost of purchasing new music. This means that EVERYONE MUST come across with TEN CENTS, if we are going to have this Band to continue to play at the games. The subscription manager for each class is as follows:

Seniors—Ray Copson
Juniors—O. H. Brewster
Sophomores—William Mazanec
Freshmen—William Burt

NEW CLUB FORMED

"Knights of the Road"

A new organization to be known in all probability as the "Knights of the Road" is in the process of formation at Tech. It has for its purpose the support of all activities, particularly athletic, and intends to limit membership to those students who have "bummed" to intercollegiate athletic contests for a distance of at least 250 miles.

Clubs of a similar nature have proved exceedingly successful at other colleges, and from the enthusiasm displayed at a meeting held last Friday, Tech gives promise of building up an organization second to none.

The prime movers in the formation have enlisted in their cohorts R. G. De la Mater of the M. E. Dept. "Del" has always been known as an enthusiastic backer and promoter of Tech activities and has promised to outdo himself in the variety of ideas brought forth in connection with the "Knights." "Del's" support alone should be ample proof of the live nature of the organization.

There are undoubtedly a number of men on the Hill who have fulfilled the requirements of membership and if they are interested in joining, application for membership should be made to any of the following: "Bruce" Brewster, Gerhardt Bittner, "Dan" Barnett, "Bassy" Bassilakis, Gordon Howes, "Art" LeClerc, "Hank" Mil-drum and "Zack" Zachrison.

The "Knights of the Road" expect to make their formal debut when Tech and Rhode Island State clash on the gridiron at Kingston, on November 1st. The charter members made unofficial trips to Rensselaer, New Hampshire University, Brown, Harvard, Lowell Textile, Springfield and Trinity. Kingston should see a score of new faces in attendance.
